## Combination Solar Pool and Water Heating for Municipal Aquatic Centers

Header manifold length 343mm  
material Luran S778T impact resistant ASA

FSEC certified TEST# 00502

Meets CSA 378 equivalency

fin tubing is duro 70 flexible "Geon"  
made in Coquitlam BC

Fin tubing strips are 95mm wide and  
any length up to 26m. 3 per header manifold

Coefficient of linear expansion  
of header manifolds is  
6.6 (E-5) in/in/F

Performance in SI units:  
 $n=0.8318-0.0721v-(18.3391+2.28v)\Delta T/G$

These cost effective solar solutions combine solar water pre-heating of the showers and pool heating using the pool as the storage

SRCC OG100 certified.  
SRCC#100-2011-121A
